For the best experience, check out our video guide at www.imototech.com. You'll also find more tips and info on our website.</div></div><div><div>Step 2: Install the Bowl</div><div>Place the clean ceramic bowl cap over the ceramic bowl, then insert the covered bowl into the G1 e-hookah head. Make sure it is securely positioned before closing the device cap.</div></div><div><div>Step 3: Power On</div><div>Connect the power cable. The blue indicator light will flash once to confirm a successful connection. Press the power button 5 times within 2 seconds to turn on the device. Also, the device will automatically shut-off after 20 minutes of inactivity when connected to power.</div></div><div><div>Step 4: Set the Heating Mode</div><div>Choose the right heating mode based on your Shisha tobacco. Use the up / down buttons to switch between:<ul style="list-style-type: none">• Dark Leaf / Mix - 10 minutes heating duration• Blonde Leaf - 12 minutes heating duration• Red Leaf - 14 minutes heating duration</div></div><div><div>Step 5: Preheating and Temperature Adjustment</div><div>Press the power button twice to start preheating. The screen will begin a countdown, based on different time periods chosen by the level, and the red indicator will flash during the preheating process. During preheating, press the power button once to pause heating, the indicator will then turn solid blue.</div></div></div></div>	<div><div>CLEANING AND MAINTENANCE</div><div><div><div>• Gently wipe the ceramic bowl and surrounding areas with a soft, absorbent cloth or paper towel. Clean the inner walls of the bowl using a damp, non-abrasive sponge and mild soap. Use the pro - vided brush to thoroughly clean the inside of the ceramic bowl. Don't forget to clean the bowl channel with the brush.</div><div><div></div><div></div></div><div><div>• Rinse the glass water tank, hose and mouthpiece under warm water with mild soap. Avoid using abrasive scrubbers on any parts to prevent damage.</div></div></div><div><div>• Ensure device is unplugged and completely cooled before cleaning. Use cup removal tool to carefully remove the used bowl, allow it to cool, and dispose of it safely.</div></div></div></div>	<div><div>DEVICE WARNING INDICATORS</div><div><div>① Short Circuit Issue: A short circuit occurred in the device. Display: </div><div>② Open Circuit or Sensor Error Issue: Open circuit or temperature sensor malfunction. Display: </div><div>③ Over Temperature Issue: Temperature exceeds the device's safety limit. Display: </div><div>④ Over Voltage or Under Voltage Issue: Voltage is above 18V or below 12V. Display: </div><div>⑤ Heating Time-Up Issue: Heating time exceeded 60 minutes. Display: </div></div></div>	<div><div>IMOTO USAGE PRECAUTIONS</div><div><div>1. Not Waterproof The device is not waterproof. Do not wash or splash water on any part of the unit.</div><div>2. Do Not Open While In Use Do not open the device cap during operation.</div><div>3. High Temperature Warning The device cap and area around ceramic bowl become very hot during use. Do not touch these areas.</div><div>4. Ensure Proper Device Cap Closure After closing the device cap, ensure it is flush and fully aligned with the top of ceramic bowl cap.</div><div>5. Silicone Replacement Caution When replacing the bottom silicone seal, be aware that residual liquid may be present. Use protective measures to avoid skin contact.</div><div>6. Avoid Restarting During Use Do not shut down and restart the device mid-session. Restarting while hot may lead to excessively high preheating temperatures, which can burn the material.</div><div>7. Avoid Extended Pauses During Use To maintain optimal smoke density and flavor, avoid pausing inhalation for too long during a session. It is recommended not to exceed 6 minutes of idle time.</div></div></div>	<div><div>WARRANTY & SUPPORT</div><div><div>Enjoy exclusive warranty coverage, professional customer support, and comprehensive service assurance.
