

Step 6: Preheating and Temperature Adjustment

Press the power button twice to start preheating. The screen will begin a countdown, based on different time periods chosen by the level, and the red indicator will flash during the preheating process. During preheating, press the power button once to pause heating, the indicator will then turn solid blue.

Step 7: Ready To Use

Once preheating is completed, the green indicator light will stay on, indicating that the device is ready for use. The countdown on the screen will end and switch to a 1-hour timer, indicating active use.

- Use the Up / Down buttons to fine-tune the temperature in ±20°C increments.
- During use, press the power button once to pause operation, the indicator will then turn solid blue.

Step 8: Enjoy Your Session

Pick up the hose and mouthpiece, then inhale to begin your session. The device provides up to 60 minutes of continuous use. During use, the indicator remains green. When the session ends, a yellow indicator light will turn on as a reminder.

Step 9: After Your Session

Once you have finished your session, carefully unplug the device from the power source. Allow it to cool down completely before handling, cleaning, or storing it.

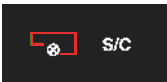

CLEANING AND MAINTENANCE

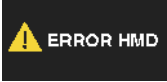

To ensure optimal performance and long-term stability, please clean and maintain the device regularly.

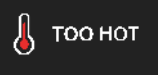

- Ensure device is unplugged and completely cooled before cleaning. Use cup removal tool to carefully remove the used bowl, allow it to cool, and dispose of it safely.

DEVICE WARNING INDICATORS

① Short Circuit  
Issue: A short circuit occurred in the device.  
Display: 

② Open Circuit or Sensor Error  
Issue: Open circuit or temperature sensor malfunction.  
Display: 

③ Over Temperature  
Issue: Temperature exceeds the device's safety limit.  
Display: 

④ Over Voltage or Under Voltage  
Issue: Voltage is above 18V or below 12V.  
Display: 

⑤ Heating Time-Up  
Issue: Heating time exceeded 60 minutes.  
Display: 

IMOTO USAGE PRECAUTIONS

1. Not Waterproof  
The device is not waterproof. Do not wash or splash water on any part of the unit.

2. Do Not Open While In Use  
Do not open the device cap during operation.

3. High Temperature Warning  
The device cap and area around ceramic bowl become very hot during use. Do not touch these areas.

4. Ensure Proper Device Cap Closure  
After closing the device cap, ensure it is flush and fully aligned with the top of ceramic bowl cap.

5. Silicone Replacement Caution  
When replacing the bottom silicone seal, be aware that residual liquid may be present. Use protective measures to avoid skin contact.

6. Avoid Restarting During Use  
Do not shut down and restart the device mid-session. Restarting while hot may lead to excessively high preheating temperatures, which can burn the material.

7. Avoid Extended Pauses During Use  
To maintain optimal smoke density and flavor, avoid pausing inhalation for too long during a session. It is recommended not to exceed 6 minutes of idle time.

G1 Battery Base

HOW TO OPERATE

Step 1: Fill With Water

Fill the glass water tank with cold water, then attach the stem connector and the G1 e-hookah head in sequence. Finally, connect the hose and mouthpiece.

Step 2: Load the Shisha Tobacco

Add 22-23g of shisha tobacco into the ceramic bowl and press it down firmly for optimal heating. For the best experience, check out our video guide at [www.imototech.com](http://www.imototech.com). You'll also find more tips and info on our website.

Step 3: Install the Bowl

Place the clean ceramic bowl cap over the ceramic bowl, then insert the covered bowl into the G1 e-hookah head. Make sure it is securely positioned before closing the device cap.

Step 4: Power On

Connect the power cable. The blue indicator light will flash once to confirm a successful connection. Press the power button 5 times within 2 seconds to turn on the device. The device will automatically shut-off after 20 minutes of inactivity when connected to power.

Step 5: Set the Heating Level

Choose the right heating level based on your shisha tobacco type. Use the up / down buttons to switch between:

- Dark Leaf / Mix - 10 minutes heating duration.
- Blonde Leaf - 12 minutes heating duration.
- Red Leaf - 14 minutes heating duration.
